"The Mascot," to be given under the direction of Mr. Dupuy for the benefit of the Non-Sectarian Benevolent association is one of the rare operas, containing a good plot, the music is bright and catchy, although of a high order, and is sure to be pleasing to Albuquerqueans when interpreted by such artists as J. O. Dupuy, J. K. Brown, Geo. Weinert, Floyd Whitson, G. W. Johnston, Jos. S. Smith, Don Strong, Miss Margaret Lee, Miss Grace Hawks and others.

Trainmaster Mulhern, of the New Mexico division, directs the attention of conductors and engineers to time-table rule No. 71, which is not being faithfully complied with on the Raton mountain. It is that the leading engine must carry the signals, and when mountain engines are

NEW NORMAL SCHOOL.

Its First Session to Open in September.

The normal school here, for which provision was made by the last territorial legislature, will open on Monday, September 5, in the Presbyterian church here which has been provided for the use of the school until the new building shall have been completed.

Prof. George Selby was elected some time ago as principal, and Prof. J. A. Long was elected assistant. A thorough course of study has been laid down and there is every reason to expect that the attendance will be good from the opening of the school.

It was the desire of the board of regents to have the building completed soon after the commencement of the first term of school, but there was a delay in letting the contract owing to some necessary changes which were made in the plans originally drawn by the architect. The contractors, Laizure & Grabe, of this city, have been rushing the work as rapidly as possible, and Robert Black, the superintendent of construction, says that the foundation of the building will be completed in a few days, probably this week.

A large amount of material is already on the ground and it will not be many weeks until the walls of the new building will attract the attention of every one who comes to Silver City. The ground which was donated to the school by the city is large enough in area to make an attractive campus, and with a little care and attention it can be made one of the most attractive places in the city.

The building is modeled after the school building which was recently put up at Denning and will cost, when completed, \$10,800.

Such a school as this which has long been needed here and previous legislatures had been asked to appropriate a fund for the purpose of establishing such a school here, but nothing ever came of it until it was brought up in the last legislature and it would have been defeated then had it not been for a compromise which divided the appropriation and provided for the establishment of a similar school at Las Vegas.—Silver City Eagle.

The Territorial Equalizers.

The territorial board of equalization got over considerable ground yesterday. Cocino county cattle were raised 75 cents per head, Graham county's stock got a reduction of 25 cents each. In Maricopa county there was a raise of 10 per cent.

No change was made in the county assessment of horses.

Sheep in Pinal county were left 31 cents per head. Gila's woolbearers were marked up 55 cents. In Yavapai county they suffered a 50-cent reduction.

In both Cocino and Apache counties there was a raise of 5 cents per head. This happened in spite of the fact that 9,000 head, assessed at \$1.25 were recently sold under cattle mortgage foreclosure for 30 cents a piece. The board cannot take such practical facts into consideration. Their only power consists in equalizing the different valuations returned by the various counties.

For fear of raising some kick among the mules, asses and goats no change was made in their appraisement. An interposition of burros indiscriminately among the above-named quadrupeds render them, like the Irishman's runt pig, very difficult to estimate.

In the matter of acreage lands Cochino county was raised 50 per cent, bringing her acres up to \$2 each. Cocino lands, including government grants which had been returned at a nominal rate only, were marked up from 35 cents to 47 cents. Maricopa's average is still under discussion. It appears that Pinal county lands have been returned at \$10 per acre, while Maricopa was only listed at \$12.

The total valuation throughout the territory, excepting land changes, show a falling off of \$2,000,000 since the assessment of 1893. Apache and Yuma counties are the only ones that do not return a lower valuation.

The Prescott & Arizona Central railroad was assessed at \$550 per mile. No change in other roads.—Prescott Journal-Miner.

A GREAT CANAL.

Plans About the New Line and Near-ness System Between White Rock, Chama and Albuquerque.

Mr. C. E. Chester, civil engineer in charge of the survey corps that has just completed the preliminary survey of an important canal line in the Rio Grande valley, left yesterday for the east, accompanied by his brother, also a civil engineer.

Mr. Chester goes to Hamilton, Ohio, to lay before Consulting Engineer J. M. Howells the field notes of this survey, and by the latter gentleman they will be submitted to the officers of the Municipal Investment company, of Chicago, owners of the Santa Fe and Albuquerque water systems.

Fifteen men were occupied five weeks and two days in running the canal survey from a point on the mesa three miles east of Albuquerque north to the mouth of White Rock canon, on the Rio Grande, twenty miles due west of Santa Fe, and some seven miles above the pueblo of Cochiti. The canal line is eighty-five miles in length, fifty feet wide in the open country and thirty feet wide in the rough, rocky parts. Its farthest point east of the Rio Grande is distant some three and one-half miles. No estimate has as yet been made as to the area of land it will irrigate. Thus far two immense storage reservoir sites have been selected, as it is the intention to make water storage the chief feature, taking the supply from the Rio Grande flood waters only, such as usually goes to waste. In this way no vested water rights in the lower country will be molested. It is said the cost of the canal and reservoirs will be close to \$1,000,000.

Engineer Chester said a splendid line had been located, with a fall of nine inches to the mile, and he seems to think the enterprise as inviting as to make it probable that construction work will not be long delayed.—New Mexican.

Supreme Court.

In the supreme court this morning, in the Sierra county murder case wherein Hipolito Armiño had been found guilty of killing his wife and sentenced to be hanged, an opinion was handed down reversing the judgment of the court below and remanding the case for a new trial. The evidence upon which Armiño was convicted was circumstantial, and the supreme court holds that the admission of illegal evidence in the court below may have worked an injury to the legal rights of the accused. The opinion was by Justice Collier, concurred in by Justices Freeman and Laughlin.

In the case of Robt. McFarlane, of Socorro, under sentence to serve twenty-one years in the penitentiary for the murder of Atanasio Vasquez, the decision in the lower court was affirmed. Opinion by Justice Laughlin, concurred in by Chief Justice Smith and Justices Fall and Collier.
